

WE ARE EUROPE!

The world has changed. The United States under Donald Trump is pressuring Europe and challenging our values. Russia is waging war in the heart of Europe. China is expanding its power. Across the globe, autocrats are gaining ground, while democracies grow weaker, more fragile, and more hesitant.

Europe remains the last major stable democracy in the world.

Together, WE ARE 450 million people who believe in freedom, human rights, the rule of law, peace, and democracy. We are not alone.

In dark times, our unity is our strength.

WE ARE EUROPE. And Europe is the future.

We are a cross-party movement. We come from different political traditions, and we will continue to argue about many things. But we cannot argue about Europe. Europe is the basis of everything.

Our goal is not to romanticise Europe. It is to preserve its values and to put them into practice. **We want to build a community in which every European is welcome, and in which we stand together to fight for a better future.**

At a time when imperial voices claim that diversity, compromise, and freedom are signs of weakness, we take a clear stand. We oppose those who seek to divide and dominate. And we understand that only a strong, united Europe can resist them. For us, there is a clear line: **this far, and no further.**

While others dismantle democracy, we defend it. While others wage war, we stand for peace. While others oppress, we fight for freedom. Europe is not perfect. But Europe is what we must defend. For ourselves, for our future, and for the world.

We are Europe's voice. And we will be loud.

WE ARE pan-European. We have organised demonstrations in 17 cities, from Warsaw and Budapest to Madrid and Brussels, now for the second time. And we will continue to take to the streets.

We mobilise the 89% who say: Europe is our future, our values, the last great hope.

Supported by businesses, trade unions, civil society, and citizens from across the democratic spectrum, we stand for a Europe that shapes its own future. We are Europe, the last major stable democracy in the world. And we will not give up.

WE ARE EUROPE. For democracy, for freedom, for the future.
